EDITORIAL COVERAGE

BioPharm^{INTERNATIONAL}

SPECIAL ISSUES

March and October 2021

Regulatory Sourcebook

The editors present a compilation of news, trends, and strategies related to regulations, guidance documents, compendial documents, and enforcement actions from global regulatory authorities.

May 2021

Partnerships for Outsourcing eBook

The editors review best practices and metrics for choosing contract service suppliers, ensuring quality control in vendor relationships, technology transfer, and intellectual property issues.

July 2021

Biopharmaceutical Analysis

The latest analytical testing methods, instruments, and practices to characterize biologic drug components during development, formulation, processing, and packaging stages are reviewed in this focused eBook.

SPONSORED-CONTENT eBooks

November 2021

Bioprocessing Application Notebook

This sponsored-content eBook will feature case studies, application notes, and posters on a range of biopharmaceutical development and manufacturing processes.

Sponsored Custom eBooks

BioPharm International's content marketing team can develop custom publications on a range of biopharmaceutical topics for single sponsors. Contact your sales representative for details.

EXPERT INSIGHT AND ANALYSIS

BioPharm International provides the biopharmaceutical industry with comprehensive coverage of key scientific, technology, regulatory, and business topics, as well as issues related to bio/pharma's response to the global pandemic.

The editorial mix of peer-reviewed papers, practical advice on managing bioprocessing and technology, regulatory and business columns, and expert commentary provides comprehensive coverage of upstream and downstream processing, manufacturing operations, regulations, formulation, scale up, technology transfer, drug delivery, analytical testing, and more.

The print and digital editorial coverage provides technical and business insight and analysis for all biologic-based therapies including monoclonal antibodies, vaccines, biosimilars, protein therapeutics, cell therapies, gene therapies, antibody-drug conjugates, and other emerging therapies.

Through expert interviews, roundtable discussions, literature reviews, and surveys, the editors report on emerging trends, strategies, and best practices in key areas.

To learn about ways to contribute, visit www.BioPharmInternational.com and click the "Editorial Information" link.

EDITORIAL FEATURES

Peer-Reviewed Research Papers

BioPharm International publishes peer-reviewed papers in the form of technical case studies/application notes; topical literature or patent reviews; novel research; or science-based opinion papers. All papers undergo a double-blind peer-review process by BioPharm International's Editorial Advisory Board of leading scientists, managers, directors, and consultants.

Technical Articles

Feature articles in BioPharm International offer timely technical and scientific discussions of ongoing drug development challenges and solutions. Articles are authored by industry experts and the magazine's editorial team.

Topics cover the full spectrum of biopharmaceutical development and manufacturing including upstream processing, downstream processing, manufacturing, quality and regulations, analytics, facilities and equipment, laboratory operations, packaging, logistics, supply chain, and business issues including intellectual property, market research, and funding.

Regulatory Beat

The latest developments, guidance documents, and enforcement action from international regulatory authorities, as well as expert analysis, are addressed in this monthly feature.

Ask the Compliance Expert

Questions about enforcement, standard operating procedures, working with FDA, and other compliance issues are answered by regulatory experts.
